6. USE AND MAINTENANCE

It is recommended to operate the appliance prior to cooking.

There shall be adequate ventilation of the room when the cooker hood is used at the same time as appliances burning gas or other fuels(not applicable to appliances that only discharge the air back into the room.

It is recommended to leave the appliance in operation for 15 minutes after cooking is terminated in order to completely eliminate cooking vapour and odour.

If the appliance is not used, please turn off.

Don't have flame under the cooker hood.

Don't use or stop use if the appliance is damaged especially the supply cord and the case.

If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

Don't immerse the appliance in liquid.

The exhaust air must not be discharge into a flue which is used for exhausting fumes from appliance burning gas or other fuels.

Regulations concerning the discharge of air have to be fulfilled.

The details concerning the method and frequency of cleaning.

In order to prevent fire hazard, it is recommendable to clean the filter at a maximum of 2 months by carrying out the followings:

--Unplug before cleaning, then remove the filters from the cooker hood and wash them in a solution of water and neutral liquid detergent, leaving to soak.

-Rinse thoroughly with warm water and leave to dry.

-The filters may also be washed in the dishwasher.

The aluminum panels may alter in color after several washes. This is not cause for customer complaint nor replacement of panels.

Clean the surface of the cooker hood regularly using cloth moistened with denatured alcohol of non abrasive liquid detergent. (Remark: These cannot clear the motor and inside part.)

Replace filters approximately every 4 months.

There is a fire risk if cleaning is not carried out in accordance with the instruction.
